**ABSTRACT** : Legumes are rich source of protein. Various storage fungi viz. *Fusarium solani* caused reduction in protein content of *Cajanus cajan*, *Vigna mungo*, *Cicer arietinum* when stored for 15, 30 and 45 days. Among the above fungi caused a slightly more reduction protein (amino acid) content of stored seed.

**Key Words** : *Fusarium solani*, protein content, legumes seeds
