Received November 11, 2010 and Accepted February 11, 2011

**ABSTRACT :** The rice variety Pusa Basmati-1401 was disseminated through Front Line Demonstrations at farmers field in Saharanpur district. The demonstrations conducted during last two years (2009 & 2010), were considered for the study. The results indicated that adoption of this variety significantly increased due to higher productivity, which ultimately resulted in more net return.

**Key Words :** Pusa Basmati-1401, yield gap, performance and adoption.
