Establishment of Modern Poultry farming System

Bioved Research Institute of Agriculture, Technology and Sciences (BRIATS) has established a Modern Poultry Farming System at Bioved Krishi Prodyogiki Gram, Moharab, Sringerpur, Allahabad. Sufficient number of broilers are produced as per monthly requirement of the adjoining areas for creating self confidence among the poultry farmers. All sorts of feed back desired by farmers i.e. about high yielding varieties of chickens, Nutritious food, medicines, farming methods and marketing arrangements are being provided to farmers and interested persons by BRIATS. This farm also provides consultancy services to poor and needy farmers, who are interested in poultry farming.

As we know, poultry is one of the fastest growing segment of Indian agriculture and is now being recognized as an organized and science based industry with tremendous potential to fight poverty, unemployment and malnutrition. Poultry industry in India has a strong standing globally being third highest egg producer and fifth highest broiler producer. Nearly 5 million people are directly or indirectly engaged in poultry sector, apart from numerous small poultry keepers in rural and tribal areas. Over the last three decades, there has been a phenomenal growth in the Indian poultry industry.
