**COMPARATIVE STUDY ON THE DRUGS PROPERTY OF
HYMENODICTYON ORIXENSE (ROXB). MABB. AND *CINCHONA
SUCCIRUBRA* PEV. EX.KLOTZ**

Received March 21, 2010 and Accepted July 16, 2010

ABSTRACT : A flowering plant growing in Myanmar, *Hymenodictyon orixense* (Roxb) ku-than belonging to the family Rubiaceae was used an antimalarial plant by traditional practitioners. For the reason of uses in malaria, similar to *Cinchona succirubra* Pev. ex.klotz a comparative histological study was conducted to reveal botanical characteristics of these two plants.

Key Words : Drug, Ku-than, Cinchona, comparative prophylaxis.
