## BIO-MANAGEMENT OF CEREAL CYST NEMATODE IN CEREALS

GL. Sharma<sup>1</sup> and K.N. Gupta<sup>2</sup>

*Received June 7, 2009 and Accepted November 11, 2009*

**ABSTRACT:** While evaluating various fungi (bio-agents) viz *Beauveria bassiana*, *Metarhizium anisoplae* *Trichoderma viride* and *T. harzianum* against *Heterodera avenae* in wheat and barley crops using as seed coat along with a treated check and untreated control, the *Beauveria bassiana* gave maximum reduction in no. cyst/plant in both cereals followed by *T. viride*, *Metarhizium* and *T. harzianum*.

**Key Words :** Cereal cyst nematode, bio-management, fungal bio-agents.
